

THEBE LEDWABA

Germiston, Gauteng, South Africa 079 187 6152 thebeledwaba@gmail.com LinkedIn [GitHub](#)

Profile

Recent Computer Systems Engineering graduate with hands-on experience in IT support, troubleshooting, and systems maintenance. Proficient in diagnosing hardware, software, and network issues, with a strong foundation in Windows OS, ticketing systems, and network fundamentals. A proactive problem-solver with excellent communication skills, eager to contribute to efficient IT service delivery while gaining practical experience in a professional environment.

Technical Skills

IT Support: Windows OS, Hardware/Software Troubleshooting, Ticketing Systems

Programming: Python, C/C++, Java, JavaScript

Web Development: HTML/CSS, Flask, Express.js, Node.js, React MySQL, MongoDB

Networking: Cisco CCNA 1-2, Network Troubleshooting, Connectivity Monitoring

Tools: Git, Visual Studio Code, Proteus, Cisco Packet Tracer

Work Experience

IT Support Intern	Scaw Metals Group, Germiston, Gauteng	2025 – Present
--------------------------	---------------------------------------	----------------

- Provided first-line technical support, resolving over 100 hardware/software issues (Windows OS, printers, network connectivity), reducing downtime by 15%.
- Logged and tracked support requests using ticketing systems, improving issue resolution time by 20% through structured workflows.
- Assisted in deploying system updates and security patches, ensuring compliance with IT policies.
- Documented solutions in a knowledge base, enhancing team efficiency and reference accessibility.

Computer Systems Intern	Resolution Circle, Johannesburg, Gauteng	2025
--------------------------------	--	------

- Supported setup and testing of electronic circuits for industrial applications, ensuring reliable system performance.
- Collaborated with IT and engineering teams to troubleshoot automation systems, gaining exposure to network and systems maintenance.

Education

Diploma in Computer Systems Engineering Vaal University of Technology (VUT), Vanderbijlpark
Completed 2025

• Key Projects:

- *Smart Inventory Tracker* (Python, ESP32, MySQL): Developed an IoT system for real-time inventory management, integrating hardware and software components.
- *Full-Stack Door Access System* (Flask, SQLite): Built a web application for secure access control, demonstrating software configuration and testing.
- *ATM Simulator* (C++): Designed an object-oriented banking system with secure transaction processing.

Certifications

- Cisco CCNA 1-2 2025

Additional Projects

- **Smart Security System** (Python, PIR/Ultrasonic Sensors): Developed an IoT solution with real-time email alerts, showcasing troubleshooting and system integration skills.
- **Bluetooth Robotic Car** (Arduino): Engineered a sensor-based vehicle with obstacle avoidance capabilities, demonstrating hardware setup and configuration.

Attributes

- Strong problem-solver with a focus on efficient technical support
- Excellent communicator, adept at assisting end-users and collaborating with teams
- Proactive learner, committed to mastering IT systems and best practices
- Detail-oriented, ensuring accurate documentation and process adherence
